To: Comité evaluador del XVIII Verano de la Investigación Científica y Tecnológica del Pacífico 2013 "Programa Delfín"

Re: Supervision of visiting undergraduate researcher Francisco Román Peña de la Rosa from Instituto Tecnológico de Toluca during his visit to the University of Victoria, June 24th - August 9th 2013

Dear Comité evaluador del XVIII Verano de la Investigación Científica y Tecnológica del Pacífico 2013 "Programa Delfín":

This letter is to confirm that I will directly supervise the undergraduate research of Francisco Román Peña de la Rosa from Instituto Tecnológico de Toluca during his visit to my Assistive Robotics and Mechatronics Laboratory (ARM Lab) the University of Victoria, June 24th – August 9th 2013.

The student will be working full time in the ARM Lab on a project entitled "Haptic rendering of the acceleration of particles moving along pre-specified paths". During his visit, I will meet with Francisco to discuss the progress of his project on a weekly basis. Two PhD students in my lab, Naser Yasrebi and Ramtin Rakhshka, will also provide guidance with interfacing a Novint Falcon haptic device to a graphical user interface developed using the visualization toolbox in Matlab or the Vortex simulation engine available in my lab.

Should you have any questions regarding the projects, the supervision, the ARM Lab or the University of Victoria, feel free to contact me anytime at danielac@me.uvic.ca or phone 1.250.721.6040.

Sincerely,

Daniela Constantinescu, Ph.D., P.Eng.

Assistant Professor
